

---

E-Brightener is a complete package that includes thumbnailer, typography software and vector editors. It has all the tools that you need to create professional looking graphics instantly. The interface is very intuitive and easy to use. E-Brightener will help you create high quality graphics for your Webpages, Flyers, Business Cards or any other design related projects with just a few clicks of your mouse! They say one man's trash is another man's treasure. But they're wrong: one man's trash can be somebody else's treasure. E-Brightener can help you produce professional-looking graphics in just minutes. It's an indispensable tool for saving hours of work that would be otherwise spent on designing graphics by hand. E-Brightener is the software that turns your XHTML pages into web pages, business card templates, poster templates, flyers and more. This program offers users the ability to create professional graphic designs without having to design them by hand or spend several days on it even if they don't like to use the mouse. E-Brightener is mainly useful for people who are not very creative, but still require specialized graphic design programs for their projects. This program is also available in French, German, Dutch and Spanish. E-Brightener can turn your XHTML pages into web pages, business card templates, poster templates, flyers and more. There are many different creative projects you can use this program for. You can create creative 5 page website layout using this program alone or you can create business cards for your business in moments with Brightener's creative business cards template. This program is also great for designing posters or fliers to promote events or ideas. You can turn almost anything into professional-looking graphics using E-Brightener. This program only requires the user to create a layout and then just one click is needed to generate a professional source code for the graphic they just created. This program has tools that help users create beautiful layouts and unique designs in just minutes. The different unique features this program includes helps your design stand out from the rest and be noticed by consumers and businesses alike. Instead of typing text manually, users can place images on the page using this program's built in image placement tool. Users can also automatically generate source codes for their images. This program also has built in typography software that allows users to create professional-looking text effects without having to design them by hand or spend several days on it even if they don't like to use the mouse. You can choose from different fonts and then apply different effects that this program includes for the text you just added. This makes creating unique and professional-looking text effects super easy! E-Brightener also has two other tools: a vector editor and a web image creator, both of which help users create unique graphics without having to design them by hand or spend several days on them even if they don't like to use the mouse.
